Approved Boot

Appropriate boots must be worn to prevent personal injury and protect the user from potential hazards associated with the work being performed (e.g., working aloft, working on uneven or slippery surfaces, etc.). Boots must meet the following requirements:

- Constructed of heavy leather or similar material that completely encloses the foot
- Ankle high
- 90 degree block heel that is at least ½ of an inch, but not more than 1-1/2 inches high

Ankle high

½ inch square heel, minimum

Heavy leather construction

Steel Shank

While it is not required, it is recommended that the boot have a steel shank for your comfort.

Unacceptable Boot

Top of boot is not ankle high

Canvas, vinyl, pigskin, or other lightweight materials

Heel not square or less than ½ inch high

You will not be allowed to attend class without the approved boots!

Example of heel of proper work boot.
