Walgreens Lean Six Sigma Testimonials

“The Six Sigma program has been one of the best development opportunities for me here at Walgreens. Guided by the Six Sigma coach, I was able to make a positive difference in the way the IT Database Department is managing its budget and inventory processes. For me, the three most important benefits of this program were: leading a project in a structured manner using DMAIC, leading a team in a changing environment, and establishing future process standards. Six Sigma is in high demand and I am grateful to the Six Sigma Team for providing me with the tools, knowledge, and perspective to make a difference.”

“The Green Belt project helped us reveal gaps between the Owned Brand supplier in communicating a regulatory event in the required time period. Both the supplier base and Walgreens teams gained knowledge of Walgreen Co. requirements and legal expectations. Our implemented process has resulted in a significant reduction in notification timeline and loss of profit.”
