

Learn With Us.

Distribution Center Supply Chain Operations Internship

Our supply chain internship program at our distribution centers focuses on the flow of goods throughout a range of functions within our distribution centers. Students will gain hands-on knowledge and experience in a variety of areas, and learn first-hand from a retail industry leader! Without the work of our distribution center team members, we couldn't provide the products and services our customers and communities have come to expect in our stores. Our distribution facilities are some of the most productive in the industry, and the secret of our success is two-fold!

Our inclusive workspace allows us to broaden our workforce by extending opportunities to people with disabilities in our Windsor, CT and Anderson, SC locations, both with specialized workstations and other accommodations;
