

Walgreens and Howard University College of Pharmacy PGY1 Community-Based Pharmacy Residency Program, Washington DC.

PGY1 Community-Based Pharmacy Residency Program Purpose: To build upon the Doctor of Pharmacy education and outcomes to develop community-based pharmacist practitioners with diverse patient care, leadership, and education skills who are eligible to pursue advanced training opportunities including postgraduate year two (PGY2) residencies and professional certifications.

Walgreens and the Howard University College of Pharmacy are united in their commitment to train future champions in the community pharmacy arena. This postgraduate year one learning experience is based in our Nation's Capital that serves a diverse patient population. Participation in this residency program will encourage the resident's creativity and enhance practice skills as they find ways to address unique healthcare challenges in the community pharmacy setting. The residency program is based at the Walgreens health-system pharmacy located at Howard University Hospital. This pharmacy location offers clinical pharmacy services for patients who are prescribed complex therapies such as HIV/AIDS, oncology, and transplant. The community pharmacists at this site work closely with medical staff to provide optimal drug therapy for patients.

This residency program provides a postgraduate training to prepare pharmacists for management and leadership for Walgreens specialty stores. This program seeks to develop a pharmacist that will be able to partner with any hospital system to provide essential transitional care services. This program will also produce a well-rounded professional who will have business acumen, heightened awareness of regulatory issues affecting the practice and experience in providing practical pharmacy education for students.
