

Walgreens Community-Based Pharmacy and Nova Southeastern University PGY1 Community-Based Pharmacy Residency Program, Miami, FL

PGY1 residency programs build upon Doctor of Pharmacy (PharmD) education and outcomes to develop pharmacist practitioners with knowledge, skills, and abilities as defined in the educational competency areas, goals, and objectives. Residents who successfully complete PGY1 residency programs will be skilled in diverse patient care, practice management, leadership, and education, and be prepared to provide patient care, seek board certification in pharmacotherapy (i.e., BCPS), and pursue advanced education and training opportunities including postgraduate year two (PGY2) residencies.

This residency program provides postgraduate training to pharmacists so that they achieve their professional goals, become a leader within the profession, provide compassionate care for the members of their community, and contribute to the Walgreens Company's advancements in health care.

The resident will have the opportunity to work closely with an interdisciplinary healthcare team at different specialty and ambulatory sites, with some sites servicing roughly 1,000 patients a month, to optimize clinical outcomes. The resident will receive training at pharmacies that offer clinical services to HIV/AIDS, oncology, transplant, fertility, and chronic inflammatory disease patients. Residents gain insight to medication management, medication reconciliation, and educational and behavioral counseling. Graduates are prepared for clinical and leadership positions in the community and specialty pharmacy setting and the community at large.

This residency is offered in partnership with Nova Southeastern University College of Pharmacy and will provide the resident the opportunity to develop academic skills by acting as a preceptor and educator and by conducting research. In addition, the resident will actively participate in education of pharmacists, technicians, and pharmacy students.

Residency Activities

The resident will participate in the provision of patient care services through the following:

- Deliver disease state management programs in HIV/AIDS, Hepatitis, infectious disease, oncology, transplant, and other chronic health conditions
- Provide medication therapy management
- Conduct specialty medication monitoring and follow-up
- Develop health and wellness programs
- Administer immunizations in a variety of settings
- Develop community outreach programs

The resident will participate in the following activities that will strengthen practice management/ leadership and teaching skills:

- Design and conduct practice-based research project
- Present research findings at appropriate regional and national professional meetings
- Execute marketing strategy for the promotion of patient care services
- Participate in NSU's Innovative Teaching and Learning In Clinical Sciences and Pharmacy

Residency Program Benefits
