

Walgreens and the UNC Eshelman School of Pharmacy PGY1 Community-Based Pharmacy Residency Program, Chapel Hill and Asheville, NC

PGY1 Community-Based Pharmacy Residency Program Purpose: To build upon the Doctor of Pharmacy education and outcomes to develop community-based pharmacist practitioners with diverse patient care, leadership, and education skills who are eligible to pursue advanced training opportunities including postgraduate year two (PGY2) residencies and professional certifications.

The residency is academically affiliated with the UNC Eshelman School of Pharmacy. This residency allows the pharmacy resident to build upon their professional skills by providing a variety of patient care services. There are two residency locations affiliated with the UNC Eshelman School of Pharmacy—one in Chapel Hill, NC and one in Asheville, NC. These sites are close to the main campus and satellite campus. The UNC Eshelman School of Pharmacy offers a multi-site community residency program, which allows the resident to network and work with many leaders in North Carolina community pharmacy.

Pharmacy residents in this setting will have a direct influence on patient outcomes through participation in patient counseling, immunization services, and medication therapy management with a specific emphasis on patient adherence. Residents will also work to develop collaboration with area providers and develop innovative clinical services for patients who are prescribed complex therapies. Residents will explore the development and evaluation of clinical services through completion of a business plan. The pharmacy resident will have an abundance of teaching opportunities. They will be able to precept student pharmacists at the practice site and instruct students in the classroom on either campus. The pharmacy resident will have an elective opportunity to participate in a teaching and learning curriculum through the UNC Eshelman School of Pharmacy or Mountain Area Health Education Center. The residency program graduates will be leaders in the pharmacy community and will have an active role in advancing community pharmacy practice.

Residency Activities

The resident will have direct influence on patient outcomes through the following:

- Patient-centered counseling
- Disease state management and health coaching for patients through the Asheville Project (Asheville site)
- Collaboration with other health care providers
- Medication therapy management programs
- Development of health and wellness programs
- Disease prevention, detection, and monitoring services (blood pressure and immunizations)
- Disease management in HIV/AIDS and Hepatitis C
- Transitions of care and adherence counseling

The resident will participate in strengthening practice management and teaching skills through the following:

- Practice management, marketing, and reimbursement
- Community outreach and education
- Optional teaching certificate through either UNC or Mountain Area Health Education Center (MAHEC)
- Teaching Assistant appointment for student pharmacists
- Preceptorship of student pharmacist learners from UNC and other schools of pharmacy
- Facilitation of classroom discussions (small group and large didactic lectures)
- Chapel Hill: Monthly diabetes education classes at the Orange County Health Department
- Asheville: Weekly patient care and practice management topics with ambulatory care residents from local programs
