

Walgreens Specialty Pharmacy and Western University College of Pharmacy PGY1 Community-Based Pharmacy Residency Program, Orange County, California

PGY1 residency programs build upon Doctor of Pharmacy (PharmD) education and outcomes to develop pharmacist practitioners with knowledge, skills, and abilities as defined in the educational competency areas, goals, and objectives. Residents who successfully complete PGY1 residency programs will be skilled in diverse patient care, practice management, leadership, and education, and be prepared to provide patient care, seek board certification in pharmacotherapy (i.e., BCPS), and pursue advanced education and training opportunities including postgraduate year two (PGY2) residencies.

The Walgreens Specialty Pharmacy and Western University PGY1 Community-Based Pharmacy Residency Program delivers postgraduate training to pharmacists so that they can advocate for patient care for the members of their community, achieve their professional goals, become a leader within the profession, and contribute to advancements in healthcare. A graduate from this program would have matured in their clinical experience and skills to provide and expand upon the patient care services conducted within community and specialty pharmacy practice. Residents will directly impact and improve patient outcomes.

This residency is based out of a URAC accredited Walgreens specialty pharmacy in Orange County, CA where pharmacy teams offer a variety of specialty clinical pharmacy services for patients who are prescribed complex therapies. Our partnership with Western University provides a unique longitudinal rotation in ambulatory care services and completion of a teaching certificate. Additional sites in Los Angeles will provide further exposure to hazardous drug compounding and district, area, and regional leadership experiences.

Residency Activities

The resident will participate in the provision of patient-care services through the following:

- Specialty disease state management in oncology, transplant, chronic inflammatory conditions, HIV, AIDS, and hepatitis
- Management of Limited Distribution Drugs
- Longitudinal ambulatory care clinic rotation
- Development of health and wellness programs
- Pharmacist-administered immunizations
- Medication therapy management
- Community outreach programs

The resident will participate in the following activities that will strengthen practice management/ leadership and teaching skills:

- Design and conduct a practice-based research project
- Present research findings at regional and national professional meetings
- Development of clinical pharmacy services
- Pharmacy practice management and district, area, and regional leadership exposure
- Complete a teaching certificate program
- Provide clinical instruction to student pharmacists

Residency Program Benefits

- Competitive stipend and comprehensive medical plan
- Travel allowance for pharmacy-related conferences
- Paid Time Off. Resident pharmacists accrue approximately 10 paid time off days during the program. The rate of accrual is based on the average hours worked and length of time in position.

Candidate Requirements

- Doctor of Pharmacy degree from an ACPE-accredited School/College of Pharmacy
