
Explore the Chief Information Officers within Wells Fargo Technology 2022 Analyst Program

Wealth & Investment Management Technology

The Wealth and Investment Management Technology (WIMT) group provides technology solutions to four key business lines for Wealth & Investment Management (WIM); Wells Fargo Advisors, Wells Fargo Investment Institute, Wells Fargo Asset Management, Wells Fargo Retirement, which is one of the nation's leading providers of investment services. WIMT provides technology solutions and manages application portfolios in terms of skills, stability, security, scalability, speed, and cost.

Consumer Lending Technology

The Consumer Lending Technology (CLT) group executes the Wells Fargo Technology strategy and offers a strategic technology perspective to the lines of business (LOBs) we support. These LOBs include Auto; Card, Retail & Merchant Services; Home Lending; and Personal Loans within Consumer Lending. Our teams provide technology solutions to the LOBs and manage the application portfolios through the enablers of skills, stability, security, scalability, speed, and satisfaction.

Information and Cyber Security

The Information and Cyber Security (ICS) group is responsible for protecting the company from cyber threats, engaging with Wells Fargo businesses, assessing information security risk, providing identity services, performing security engineering, and operating the ICS function.

Enterprise Functions Technology

The Enterprise Functions Technology (EFT) group provides technology solutions and support for Risk, Audit, Finance, Marketing, Human Resources, Corporate Properties, and Stakeholder Relations business lines. In addition, EFT provides unique technology solutions and innovation for Wells Fargo Technology, Enterprise Shared Services, and Enterprise Data Management. This combined portfolio of applications and tools are continually engineered to meet the challenges of stability, security, scalability, and speed.

Digital Technology & Innovation

The Digital Technology and Innovation group supports the Corporate Strategy, Digital Platform & Innovation Business. Together they work closely to continue evolving Wells Fargo's digital platforms and enhance integration of the innovation pipeline into our customer-facing capabilities.

Commercial and Corporate & Investment Banking Technology

The Business CIO groups execute the Wells Fargo Technology strategy and offer a strategic technology perspective to the lines of business (LOBs) they support. The groups provide technology solutions to the LOBs and manage the applications portfolio in terms of skills, stability, security, scalability, speed, and cost.

Chief Technology Office

The Chief Technology Office (CTO) optimizes the engineering experience by streamlining and offering consumable, cloud-based, certified automation across the engineering life cycle. The group creates, publishes, and enforces architectural standards and development frameworks, and supports the adoption of cloud and Agile.

Consumer & Small Business Banking Technology

Consumer & Small Business Banking Technology is a customer-focused organization that delivers the next generation of payments capabilities; advances digital offerings; enables innovation to develop new customer experiences and products; and enhances digital channels, branches, contact centers, and ATM technologies.

Technology Infrastructure

Technology Infrastructure supports and delivers enterprise infrastructure services that enable our Wells Fargo customers globally. It is responsible for enterprise-wide infrastructure services across the global footprint, including networking, production services, storage, data centers, mainframe, midrange and Cloud-based systems, distributed systems, and international infrastructure.

Technology Remediation Program

The Technology Remediation Program (TRP) reduces near-term risks and ensures sound risk management for Wells Fargo by accelerating technology remediation efforts. In support of the Technology Compliance Plan (actions Technology is taking to establish a strong information security program and apply a risk governance framework), this group partners with teams across Wells Fargo Technology, Data Management & Insights, Corporate Risk, and Wells Fargo Audit Services.
