Welcome to the Valley Health System Education and Training Center!

We are pleased to provide a learning environment aimed at facilitating your success on the job. As a centralized education department, our goal is to develop and deliver standardized education that meets the core learning needs common to all VHS facilities. Standardized programs are important to support the mobility of staff among all facilities and to minimize variations that can pose risk to quality. The centralized model allows for efficient use of resources, consistency in delivery of quality program content, integrity of skills performance, and ultimately consistency and quality of care delivery.

The staff at the VHS ETC are highly experienced in the field of adult education, classroom management and training modalities, and individually carry a wealth of experience in a variety of nursing clinical settings and technologies.

I am proud of the experts who make up the centralized education team and it is an honor for me to serve in the role of chief learning officer for this GREAT organization. The Valley Health System invests in each and every employee and this new training center is proof positive of that. On behalf of your centralized education team I wish to invite you:

It's a GREAT Day to Learn Something New!

Nina Carter, PhD, RN

System Director Education, Learning & Development
