

Join Cedars-Sinai Cancer

Cancer research breakthroughs begin in our labs with faculty just like you

Join us as a Research Scientist, Cancer Prevention and Control Program.

Join our cancer enterprise at Cedars-Sinai Cancer during a transformational period of growth and impact. Ranked by US News & World Report as the #7 Best Hospital in Cancer in 2020-2021, Cedars-Sinai Cancer is looking for a nationally recognized investigator for the position of Research Scientist of the Cancer Prevention and Control Program.

The Cancer Prevention and Control Program at Cedars-Sinai Cancer invites applications for full-time Faculty Members at the Full, Associate or Assistant level. We are seeking creative individuals with an active research program in the broad discipline of cancer prevention and control. This can include but not be limited to intervention development, epidemiology, screening and early detection, survivorship, and health delivery sciences.

The Cancer Prevention and Control (CPC) Program includes 25 program members who have expertise across epidemiology, drug and lifestyle interventions, genetics, psychology, rehabilitation oncology, molecular biology, health disparities and genomics. The CPC Program fosters a collaborative and multidisciplinary research environment in which members have access to exceptional, state-of-the-art core facilities, training grants and clinical scholars' program, developmental funds, interaction with other research programs including an outstanding cancer genetics program, and a formal network of hospital affiliations serving the Greater Los Angeles area. Programmatic strengths in the development and application of advanced technologies from wearable devices to genomics in population and clinical research are an emerging area of distinction.

In addition to a large patient population within the Cedars Sinai Cancer Clinical Programs, the Greater Los Angeles and its surrounding communities comprise one of the largest and most diverse populations in the United States. This includes Latinx, Filipinx, Korean, African American, Jewish American, LGBTQ+ and non Latinx White communities – each with unique cancer burdens and unaddressed cancer research needs. As the CPC program grows, priority areas for faculty recruitment are focused on identifying individuals whose research is positioned to address the immediate and future cancer needs of these communities. As such, individuals with active research related to the prevention and control of HPV, tobacco and obesity associated cancers as well as specific activities in cancers of the liver, prostate, and breast are encouraged to apply.

Applicants should have a strong track record of scholarship, evidenced by independent cancer research funding and peer-reviewed publications. Academic rank is commensurate with qualifications and experience.

We invite candidates with strength in any research area broadly defined by cancer prevention and control to apply.

Are you right for this role? A successful candidate has:

- The ability to maintain an outstanding, robust and independent scientific program in cancer prevention and control
- A solid track record of peer-reviewed cancer relevant extramural funding
- An extensive publication record in high impact peer-reviewed journals
- A successful track record of developing innovative research programs.

Interested candidates should send their CVs, a cover letter as well as names of three references to Patricia Thompson, PhD and Marc Goodman, PhD, Program Leaders, Cancer Prevention and Control, Cedars-Sinai Cancer c/o AcademicRecruiting@cshs.org.

Apply now!
AcademicRecruiting@cshs.org

Cedars-Sinai seeks to find, develop, and retain the best clinical and research faculty. We promote excellence through diversity and encourage all qualified applicants to apply. We are an equal opportunity/affirmative action employer, M/F/Vets/Disabled

About Cedars-Sinai Cancer

Ranked by **US News & World Report** as the **#7 Best Hospital in Cancer Nationally and #1 in California in 2020-2021**, the Cedars-Sinai Cancer program sees over 4800 new cases of cancer per year and is part of the Cedars-Sinai Health System, a rapidly expanding vertically integrated health system with practices located in Southern California, including Tower Hematology-Oncology, The Angeles Clinic and Research Institute, Cedars-Sinai Valley Oncology Medical Group, Cedars-Sinai Marina del Rey hospital, Hunt Cancer Institute at Torrance Memorial, and Cedars-Sinai Medical Center.

Cedars-Sinai Cancer continues to pursue excellence with plans to greatly expand and sharpen the focus of its basic and translational research programs and its studies of populations and cancer disparities that are unique to its geographic area, focusing on cancer prevention and helping to change behaviors to ensure a healthier lifestyle.

Academic Research

Along with caring for patients, Cedars-Sinai is a hub for biomedical research and a top 10 academic medical center for NIH funding with over \$200M in extramural research grant funding. As the largest academic medical center in the western United States, Cedars-Sinai is also training the next generation of physicians, researchers, and allied health professionals.

[Physicians and scientists at Cedars-Sinai are actively engaged in translational research to bring medical advancements directly from the laboratory to the bedside.](#)

Community Outreach

[A commitment to meeting the community's health needs](#) has been a defining quality of Cedars-Sinai since the beginning - from the opening of the 12-bed Kaspere Cohn Hospital in Angeleno Heights in 1902 to what is now a world-renowned, nonprofit academic medical center with 890 licensed beds.

About Cedars-Sinai

Cedars-Sinai is a leader in providing high-quality healthcare encompassing primary care, specialized medicine and research. Since 1902, Cedars-Sinai has evolved to meet the needs of one of the most diverse regions in the nation, setting standards in quality and innovative patient care, research, teaching and community service. Today, Cedars-Sinai is known for its national leadership in transforming healthcare for the benefit of patients. Cedars-Sinai impacts the future of healthcare by developing new approaches to treatment and educating tomorrow's health professionals. Additionally, Cedars-Sinai demonstrates a commitment to the community through programs that improve the health of its most vulnerable residents.
