HOW DO YOU SAVE MORE THAN JUST TIME?

Now you can simultaneously post jobs to multiple destinations. Track each job from the time they open in your ATS to the moment a candidate is hired. And manage your recruitment spend in a way you never have before with the TalentBrew Software Platform's Job Distribution tool.

JOB DISTRIBUTION

STREAMLINE POSTINGS AND MEASURE PERFORMANCE WITH EASE.

Job Distribution (JD) is a central resource for posting jobs across thousands of media destinations at any time – efficiently and seamlessly – as well as tracking activity and managing posting memberships. It's simple to use:

1. Create jobs in your ATS or use jobs that have been imported from your TalentBrew Career Site.
2. Send the jobs to Job Distribution and choose your media.
3. Job Distribution posts them to all of your selected media – immediately or per your schedule.

Once a job is posted, JD starts tracking right away. It can even send the source of the information back to your ATS. And if you need help at any time, a dedicated customer support team is accessible via phone, email and online.

A NEW LEVEL OF CONTROL.

You can customize your postings per media, tailoring your message to speak directly to the job board's audience. And JD's powerful reporting delivers insights into real-time posting activity, posting expenditures and ROI tracking to highlight successful placements or low performers.

You can also manage the amount of postings your recruiters are using by limiting inventory by group or requiring approval for additional recruiting spends. And recruiter memberships are under your full control – allowing you to share inventory, rather than fight for it.
Take advantage of the TalentBrew Software Platform's integration capabilities and use JD in conjunction with your overall TMP media and recruitment plan to track your entire recruitment lifecycle.
