

Client Solutions Group Engineering Intern Program

Our engineering interns will be exposed to a variety of organizations and functions across Dell, to broaden and enrich their internship experience. The roles interns are placed into depends on their education but frequently interns will work in our product development organizations doing electrical design, software development (full stack from firmware to applications to web and cloud), test automation, system architecture and CTO, security, industrial design, and engineering program management.

Finance Intern Program

The Finance Internship Program is an intensive development opportunity designed to equip undergraduate Finance and Accounting students with the tools and knowledge to thrive at Dell. In the program, interns work on a team to gain valuable experience via at least one specific project, culminating in an end-of-summer presentation to management.

Dell Financial Services Internship Program

Dell Financial Services (DFS) facilitates financing of technology products and services for consumers, businesses, and educational and public institutions. Working at DFS is a unique opportunity in that Interns are exposed to the full operating structure of the financing business. Also, interns are included in the Finance Intern Program at Dell and will work on challenging and strategic projects in a variety of key functional areas within DFS.

Business Operations Internship Program

The Business Operations Internship is a summer program providing insight into the behind-the-scenes projects. Interns will work on business planning by product line and/or geographical selling territory, providing field support and systems updates to enable accurate sales reporting, supporting the building of predictive models using data analytics, and supporting the building of predictive models using data analytics.

Global Operations Internship

Join a world-class Global Operations supply chain where you can drive lasting change while building a long-term career. Our talented supply chain experts and benchmarked processes and capabilities are supporting the company's transformation strategy. With in-house supply chain training and development programs that enable our team members to build their careers with us.

Dell EMC Inside Sales Internship Program

Our Program is a unique opportunity for the next generation of Sales Leaders. The sales interns will receive training on products, how to run a basic sales cycle, prospecting, organization, and customer communication. Also, will be tested weekly on their knowledge and complete full custom role play scenarios with their manager. Success within the inside sales internship program will enable students to interview for a full-time opportunity within our Inside Sales Development Program.

Dell Technologies Services Internship

The Dell Technologies Services Internships is made up of global operations teams to include customer service, supply chain, and professional services; marketing and sales operations teams, finance, engineering, and more. Roles include a combination of project management and internal consulting roles. Interns joining this team will be expected to apply strong consulting skills to a broad set of business improvement opportunities, including: mergers and acquisitions, operations improvement, cost reduction, and business optimization.
