

STEMAspire

Mentoring Program

STEMAspire is a mentoring program, which connects female university students of STEM (Science, Technology, Engineering and Mathematics) to experienced professionals and role-models within Dell Technologies. Our goal is to encourage and empower women studying technology to graduate and to have successful careers in the technology sector.

What you can expect in the program?

Mentorship program will take place from end of October till March and during these almost 5 months, you will:

have 1x1 sessions with mentors from our team guiding your career in tech

attend development activities & practical workshops to boost your skills (self-awareness, confidence building, presentation skills, personal brand etc.)

meet & network with successful professionals (not only) from Dell Technologies

How do you apply?

If you are a women studying at university in the STEM field, interested to get insights into careers in tech sector - then the program is for YOU!

Send your CV to kariera@dell.com ! We will be happy to get your application.

STEMAspire

Thanks to this program I found out that I am not the only woman looking to start their career in STEM! I appreciate the chance to work with recruitment team, which helped us to improve our LinkedIn, CV and gave us useful tips for interview process.

What is more, this program helped me improve my communication skills and gave me the opportunity to get in touch and connect with like-minded community of people.

Lesana Visacka

STEMAspire

Thanks to STEMAspire, I met a lot of inspirational women and realized that there is nothing to fear after studies. It allowed me to have a glimpse into what a working life in a huge IT company looks like.

I am extremely excited that thanks to this program and everything I learned, I was able to score an internship with Dell Technologies. I did not only enjoy the soft skills workshops we had, but also meetings with my mentor focused on practical skills.
