

You are the future.
You are unique.
**You can change
the face of tech.**

PROGRAM OVERVIEW

Changing the Face of Tech is a career and diversity program sponsored by the Dell Technologies Services and Digital organization. The program was launched in 2018.

This highly interactive program provides diverse college students a unique and personalized experience to learn more about technology career opportunities by learning from dynamic young professionals of color (who “keep it real”), networking with cross-functional Dell teams and gaining key skills through hands-on workshops.

Dell Technologies knows that the innovation and workforce of the future must reflect our diverse society. The Changing the Face of Tech program is a powerful and effective example of how we can engage and hire bright, driven and diverse talent.

The program continues to evolve and grow and we look forward to meeting YOU—and changing the face of tech, together.
