

The health and safety of our employees and customers is a top priority. To help make our work environment safer, DIRECTV is implementing the following vaccine policy for U.S. employees:

MANAGEMENT EMPLOYEES

Except where prohibited by law, management employees are **expected to be fully vaccinated** against COVID-19 when they:

- Enter a DIRECTV work location, including any AT&T facility where the DIRECTV management employee may work, or client site.
- Attend in-person meetings or visits with employees, visitors, customers, or suppliers

The CDC says you are fully vaccinated two weeks after getting the final dose of a COVID-19 vaccine that has received final approval, or approval under an emergency use authorization, from the U.S. Food and Drug Administration (FDA) or that has been listed for emergency use by the World Health Organization (WHO).

COVID-19 Vaccination Resources

We understand some employees may be concerned about getting the vaccine and encourage employees to consult their healthcare provider and review the following resources on the CDC website to learn more.
