

Eli Lilly & Company Visiting Scientist Fellowship

The **Visiting Scientist Fellowship** is an esteemed pharmaceutical industry-based program, which has developed highly competitive and marketable industry professionals since 1994. A deeply involved, influential, and passionate network of more than 175 alumni across the pharmaceutical industry are contributing to the development of the next generation of medicines to improve patient lives.

Designed to train professionals for a career in the pharmaceutical industry, the fellowship offers a wide array of dynamic and challenging positions, while creating an environment that fosters personal and professional development. This one-year post graduate program presents PharmD, MD and relevant PhD or Master's degree graduates with cross-functional exposure to **clinical development, commercial, medical, project management and regulatory** aspects of drug development. Fellows **directly impact** the business at Eli Lilly and Company to speed innovation while developing valuable and lifelong career skills.

Lilly

Eli Lilly and Company

Eli Lilly and Company is one of the largest global, research-based pharmaceutical companies in the world. Lilly is committed to making medicines that help people live longer, healthier, more active lives.

Focused on the **core therapeutic areas of diabetes, immunology, oncology, neuroscience and pain**, approximately 33,000 Lilly employees keep patients and health care providers at the heart of every aspect of their business. Marketing products in 120 countries, Lilly strives to develop innovative medicines at lower costs and faster speeds.

Headquartered in Indianapolis, Indiana, Lilly provides a diverse and inclusive work environment and offers a variety of activities, support and research groups and resource groups for employees with common interests or similar experiences. Lilly is honored to be consistently ranked as one of the best companies in the world to work for and was recently recognized by DiversityInc as one of the top 5 most diverse and inclusive companies. Generations of Lilly employees have sustained a culture that values **excellence, integrity and respect for people**.

Shyam Desai, PharmD, Clinical Research Scientist, University of Illinois at Chicago

Uche Mordi, PharmD, Global Patient Outcomes & Real World Evidence, University of California - San Francisco

"The Visiting Scientist Fellowship program provided me with the opportunity to learn about drug development and regulatory science through experiential learning. The program provides value by giving fellows the opportunity to take on meaningful projects, receive dedicated training, and form a committed work group to spark innovative ideas. I have found significant value in the program as it shaped my career aspirations as a pharmacist and as a scientist."

Elizabeth Bearby

Vice President, Portfolio and Project Management,
1996-97 Visiting Scientist, Regulatory Affairs

Visiting Scientist Concentrations

Visiting Scientist Fellows have found successful and rewarding careers in a multitude of functional areas across pharmaceutical drug development and commercialization. Traditionally, the fellowship recruits within 5 core functions: clinical development, commercial, medical, project management and regulatory. VSF fellows are responsible for impactful deliverables; therefore, exact positions for the 2020-2021 VSF class will be determined strictly based on business needs and will be announced by late-October.

To learn more about Lilly and the available positions please visit <https://careers.lilly.com/visiting-scientist> and register to attend our webinar series:

- » Leadership led webinars: October 2 at 7pm EDT & October 8 at 7pm EDT
- » Fellow led webinars: October 17 at 7pm EDT & October 30 at 9pm EDT

Clinical Development

Clinical development fellows work cross-functionally in the planning of clinical programs through use of rich data sources, targeted innovation and expertise in functional trial delivery. Fellows work across therapeutic areas to optimize study designs by connecting asset teams to new capabilities to improve patient/site experience, trial achievability, and overall business processes.

Medical Affairs / Health Outcomes

Medical affairs and health outcomes fellows support the launch of important new medicines through cross-functional collaboration and evidence generation. Fellows work in partnership with clinical trials, marketing, patient safety, medical information, scientific communications, regulatory, and advocacy to support the creation, development, approval, and execution of clinical trial and disease state support materials related to Lilly products in development and on the market. Fellows also have the opportunity to collect and analyze customer insights and generate evidence to support launch and post-launch deliverables.

Regulatory

Regulatory affairs (RA) fellows act as the interface between the pharmaceutical industry and the drug regulatory authorities around the world. RA is involved in every stage of development and commercialization. Fellowship positions may exist in various areas of RA including labeling, policy and intelligence, and advertising/promotion. Fellows will have the opportunity to influence regulatory strategies for products as well as regulatory science initiatives globally.

Commercial

The Commercial fellows merge clinical skills with business acumen and economics. It requires vision and execution of best-in-class methodologies for the rapidly changing customer landscape. Fellows will provide knowledge and experience on customer insights, optimization of clinical trial design, pricing and access, contracting/distribution strategies, development of policy positions, and product selection strategy and tactics.

Project Management

The Project management fellows lead cross-functional teams by maintaining a clear focus on the overall scope, budget and timeline of a project in order to deliver high quality products. Within the pharmaceutical industry this occurs by translating a clinical development strategy into the creation and execution of a credible non-clinical and clinical project plan with a goal of delivering timely and differentiated medicines to patients. Fellows are encouraged to gather a deep comprehension of the drug development process through proactive leadership and relationship building.

Why the VSF?

- » Highly competitive stipend
- » Full suite of Lilly employee benefits including: relocation assistance, vacation and company holidays, 401(k), medical, dental, and life insurance, as well as access to all employee activities and groups
- » Optimal balance of professional and personal development
