

# Parexel FSP invests in biometrics hub in Argentina to serve global customers

Parexel FSP is delighted to announce that it is launching a new biometrics hub at its established location in Buenos Aires, Argentina. Parexel has enjoyed a thriving presence in Argentina for over 15 years, with a dedicated team of over 450 employees already in the region supporting a variety of clinical research roles across both FSP and full-service models.

Building on this strong foundation, Argentina has now been selected as a location to further extend Parexel FSP's biometrics capability across statistical programming, biostatistics, and data management, with plans to bring on a significant number of new hires in the area. The location is ideally suited as a biometrics hub, enabling seamless support for Parexel FSP's portfolio of large pharmaceutical customers, thanks to its alignment with USA time zones and access to talent pools.

The Buenos Aires biometrics FSP hub will be led by Kirill Skoubine, Senior Director, Biostatistics and Programming FSP who recently relocated to the region with his family. During his 20-year tenure with Parexel, Kirill has held a variety of data operations leadership roles and brings a wealth

of management experience to this new endeavour. He said, "The establishment of a dedicated biometrics hub in Argentina will enable us to further enhance our service to our global FSP clients, especially those located in North America.

I'm looking forward to building and leading an industry-leading biometrics team and believe we provide an exceptional career pathway for analytical professionals, offering both stability and deep sponsor engagement. We have a variety of rewarding roles available now for both experienced and early-career candidates, working closely with pharmaceutical sponsors on exciting and innovative development programs. Since I've joined Parexel's Argentina office, I've been struck by the

collaborative and nurturing work environment and am confident that our new hires at Parexel FSP will also receive the warmest of welcomes.”

Parexel FSP currently has 25 open opportunities across biometrics disciplines at a range of levels with the expectation that scope will increase further over

the coming months. Our roles encompass office-based positions situated at our attractive riverside premises in Buenos Aires or flexible and remote working options.
