

Parexel® Informatics

Bringing together people, process, data and technology

Parexel® Informatics develops technological innovations to make the process of drug development faster, more accurate, more productive and easier to track. Our dedicated Informatics group creates industry-leading, integrated platforms and applications designed by clinical researchers to improve the way companies perform clinical trials, control and share data, track and report patient outcomes, and manage regulatory information. Parexel is leading the way in the adoption of cloud technologies for clinical trials and is a Tier Zero Microsoft partner. With our 35+ years of in-depth experience in clinical logistics, regulatory and commercialization, our technology solutions are built on proven best practices to simplify the whole drug development process.

Our Informatics Hub in Nottingham

- › 350 employees and growing
- › Modern location at Canal Wharf
- › Great transport links, 5mins walk from the city centre
- › Our Benefits:
 - › 25 days annual holiday
 - › Health Cash Plan
 - › Contributory pension scheme
 - › Sports and social club
 - › Adjust and add benefits fitting to your lifestyle

Technology Highlights

- › Perceptive® Cloud
 - Built on Microsoft Azure
 - Helps streamline processes, improve transparency and promote collaboration. Workflows are optimized for a seamless user experience. The flexible, open, scalable architecture simplifies data integration and enables faster response to changing market demands.
- › Perceptive MyTrials® Analytics
 - Is a suite of mobile-enabled dashboards. This single entry-point gives access to data analytics and milestones for all the studies simultaneously, in real-time, so informed decisions can be made.
- › Patient Sensor Solution
 - Incorporates our broad range of services and clinical trial expertise to facilitate the collection of study-subject data via medical devices, coupled with robust predictive analytics.

Business Accomplishments

- › We have more than 40 data-driven services to help complete clinical trials quickly
- › 100% – Every single one of the top 15 pharma companies are running Parexel® technology
- › We have integrated technology solutions for every step of the drug development
- › We offer unparalleled global proficiency, with one central point of contact for multiple services and all modalities

Goals

- › Truly adaptive clinical trials
- › Personalized medicine
- › Effective use of real world evidence
- › Patient and site engagement
- › Smart workflows
